## FREEDOM AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

December 2024 Update

### WHAT'S NEW?

The design of the Middle School | High School project continues to progress with increased 3D renderings becoming available. Final discussions are taking place on the site design as the design team works to seamlessly integrate the new addition with the renovated building. Additionally, detailed operational conversations are underway as architects and engineers collaborate to finalize the design.

### PLANNING & DESIGN UPDATE

We are just a few months out from an exciting milestone: the initiation of the construction process. Logistics – such as mid-renovation staff locations – are being coordinated with the construction manager while architects and engineers finalize construction details to ensure the building remains operational throughout the process. Ensuring safety and minimizing impact on learning remain top priorities as the project moves closer to commencing construction.

### NEXT STEPS

- » Ongoing engineering coordination
- » Detailed construction drawings
- » Town and County coordination

RENDERING OF THE NEW MIDDLE SCHOOL ENTRANCE
