

## FREEDOM AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

October 2024 Update

### WHAT'S NEW?

There has been exciting new progress on the Freedom MSHS project. As you can see with the two preliminary renderings, the color palette for the project is coming together with the initial focus being on the public areas of the building. It is important to Freedom Area School District and the design team to create a cohesive design between the addition and the existing building. Conversations continue to evolve on how to tie everything together. It is exciting seeing the Freedom Green and uses of the accent yellow and some wood tones being introduced into the project. As the months continue, more interior renderings will be shared as they become available.

referendum projects

### PLANNING & DESIGN UPDATE

The project is at the point in the process where the floor plan is locking in to the final form as many user conversations are wrapping up. Conversations are now turning more to the operations side of the project, and as noted above, making sure that there is a cohesive design from the addition spaces into the renovated existing building. All engineers on the project are fully engaged and are looking towards a final production date of April 4th, 2024. Although that feels like a long time from now, the process will move quickly over the months ahead.

### NEXT STEPS

- » Final User Group/Staff Meetings
- » Engineering coordination
- » Interior finish selections
